The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Ruffer Pacific & Emerging Markets Fund, C Income, a fund within LF Ruffer Investment Funds (ISIN: GB00B7GW0G44)

The fund is managed by Link Fund Solutions Limited.

Objective and investment policy

Objective

The fund aims to achieve consistent positive returns over a five year rolling period. There is no guarantee that the objective will be met or that a positive return will be delivered over any time period and capital is at risk.

Investment Policy

The fund will invest in an actively managed portfolio comprising of at least 70% in equities and equity related securities of companies listed, quoted or traded in the Asia Pacific region or emerging market countries. The fund will retain an Asia Pacific bias; non-Asian emerging markets will account for not less than 10% and not more than 35% of the sub-fund's investments.

Essential features of the fund:

- The fund has the discretion to invest in the investments as described above with no need to adhere to a particular benchmark.
- You can buy and sell shares in the fund on each Wednesday if that is a business day and the last business day of each month.
- The fund aims to distribute available income every six months.
- Derivatives are used for investment purposes and to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Counterparty Risk: As the fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Operational Risk: Emerging markets tend to be more susceptible to large short term swings than more established markets. There is also a greater risk of being unable to buy or sell securities or that other parties may default and not meet their obligations, causing loss to the fund.
- Liquidity Risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings.
- Financial Techniques Impact: The fund invests in derivatives. A relatively small movement in the value of the derivative's underlying investment may have a much larger impact, positive or negative, on the value of the fund than if the fund were to hold the underlying investment itself. Derivatives are used to reduce risk by hedging against movements in the value of investments held by the fund.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.
